

Supplementary Fig. 1. ROC curve for prediction of growth of IVADA vascular geometric factors. ROC curve for prediction of growth of IVADA by VTI (blue), aneurysm diameter (green), BA-ipsiVA angle (ivoy), VA-VA angle (purple) and aneurysm ratio (yellow). Results are presented as an odds ratio and 95% CIs. BA, basilar artery; CI, confidence interval; ipsiVA, ipsilateral VA; IVADA, intracranial vertebral artery dissecting aneurysm; ROC, receiver operating characteristic; VA, vertebral artery; VTI, vertebral artery tortuosity index.
