

SUPPLEMENTAL INFORMATION

Title: Psychoacoustic and archeoacoustic nature of ancient Aztec skull whistles

Authors: S Fröhholz, P Rodriguez, M Bonard, F Steiner, M Bobin

SUPPLEMENTAL FIGURES

Figure S1 | Representation similarity analysis on SW sounds. (a) Representational similarity analysis (RSA) on the acoustic patterns. (b) RSA on the perceptual rating patterns.

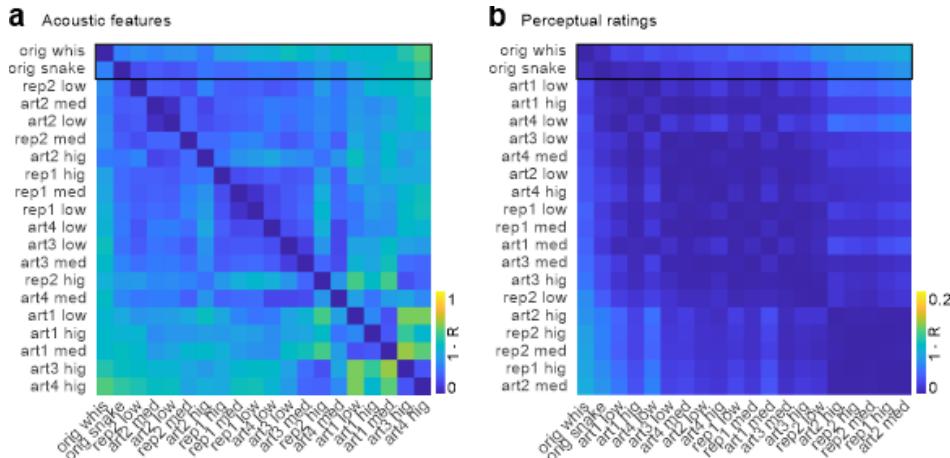

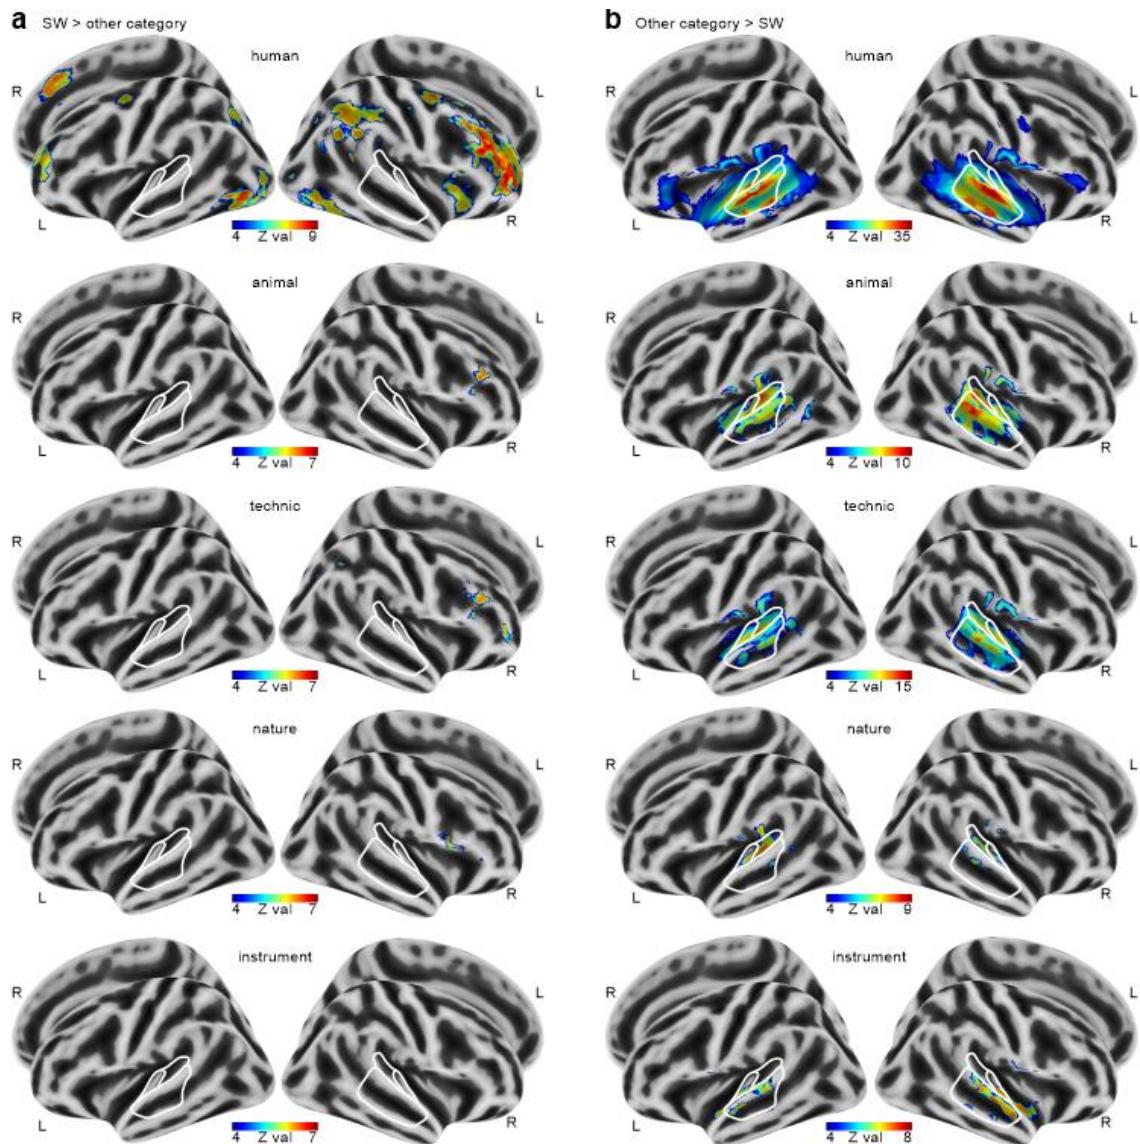

Figure S2 | Brain responses to SW sounds. (a) Functional brain activity in human listeners (n=32) when comparing activity for SW with activity for all other 5 general sound categories separately. (b) Same as in (a) but reversed contrasts in terms of higher brain activity for other sounds compared with SW sounds. All brain activity includes a voxel threshold $p < 0.05$ (FWE corrected), cluster threshold $k=10$.

SUPPLEMENTAL TABLES

Table S1 | Description of sound files. The study used a general collection of n=2567 sounds from 86 different sound categories. The table lists the abbreviations, file name, and the number of sounds per sound category.

Abbreviation	Full name	Number of sounds
SW orig	SKULL WHISTLE original	35
SW high	SKULL WHISTLE replica high	90
SW med	SKULL WHISTLE replica medium	90
SW low	SKULL WHISTLE replica low	90
AZT flu	AZTEC ancient flute	15
AZT inc	AZTEC ancient incense	4
AZT tru	AZTEC ancient trumpet	11
MEX eag	MEXICAN flute eagle	12
MEX jag	MEXICAN flute jaguar	11
MEX llo	MEXICAN flute llorona	11
MEX owl	MEXICAN flute owl	12
MEX sca	MEXICAN flute scary / monkey	17
MEX tur	MEXICAN flute turtle	11
MEX eag mod	MEXICAN flute eagle (modulated)	10
MEX jag mod	MEXICAN flute jaguar (modulated)	13
MEX llo mod	MEXICAN flute llorona (modulated)	10
MEX owl mod	MEXICAN flute owl (modulated)	11
MEX sca mod	MEXICAN flute scary (modulated)	8
MEX tur mod	MEXICAN flute turtle (modulated)	13
ANI bird (pas)	ANIMAL bird passeriformes	21
ANI bird (psi)	ANIMAL bird psittaciformes	22
ANI bird (str)	ANIMAL bird strigiformes	24
ANI insect (buzz)	ANIMAL insect buzzing	25
ANI insect (str)	ANIMAL insect stridulations (criquet)	23
ANI mamm (bov)	ANIMAL mammal bovidae	29
ANI mamm (can)	ANIMAL mammal canidae	40
ANI mamm (fel)	ANIMAL mammal felidae	37
ANI mamm (mon)	ANIMAL mammal monkey	21
ANI mamm (sui)	ANIMAL mammal suidae	21
ANI rept (cro)	ANIMAL reptile crocodylia	20
ANI rept (squ)	ANIMAL reptile squamata	29
ANI amph (anu)	ANIMAL amphibian anura	22
ANI bird (acc)	ANIMAL bird accipitriformes	22
ANI bird (gal)	ANIMAL bird galliformes	35
HUM speech	HUMAN speech	22
HUM whisper	HUMAN whisper	30
HUM mouth	HUMAN mouth	15
HUM anger	HUMAN voice anger	5
HUM fear	HUMAN voice fear	10
HUM pain	HUMAN voice pain	5
HUM sadness	HUMAN voice sadness	5

HUM neutral	HUMAN voice neutral	20
HUM joy	HUMAN voice joy	15
HUM laugh	HUMAN voice laugh	28
HUM pleasure	HUMAN voice pleasure	5
HUM ulu	HUMAN voice ululation	25
HUM baby	HUMAN baby cry	62
HUM body (move)	HUMAN body movement	53
HUM body (bre)	HUMAN body breath	27
HUM body (che)	HUMAN body chewing	27

Table S13 | Functional brain clusters resulting from connectivity analyses. (a) Significant functional connectivity with right fronto-parietal seeds, (b) left auditory cortex seeds, (c) right auditory cortex seeds. Voxel-level threshold of $p=0.005$ combined with an FWE-corrected cluster-level threshold of $p=0.05$.

Cluster	Cluster size	MNI coordinates		
		x	y	z
(a) Right fronto-parietal seeds				
L inferior frontal gyrus, insula	883	-34	24	-6
R medial frontal cortex, anterior cingulate cortex	617	6	22	50
R inferior frontal cortex, insula	328	44	18	0
(b) Left auditory cortex seeds				
L medial frontal cortex	1171	-6	42	46
L motor cortex	497	-26	-20	68
L angular gyrus, superior temporal sulcus	461	-24	-84	-38
L superior temporal gyrus	437	-58	-62	22
R angular gyrus, superior temporal sulcus	1598	36	-80	44
R inferior frontal gyrus, insula	383	46	12	4
(c) Right auditory cortex seeds				
L cuneus	415	-4	-92	34

Table S14 | Peak location of brain activity for the cross-correlation analysis. **(a)** Significant brain activity for the cross-correlation approach with the acoustic patterns and **(b)** with the perceptual rating patterns. All brain activity includes a voxel threshold $p < 0.05$ (FWE corrected), cluster threshold $k=10$.

Region	Cluster size	Z value	MNI coordinates		
			x	y	z
(a) Acoustic: cross-correlation					
L superior temporal gyrus	9548	Inf	-56	-10	-2
		Inf	-60	-30	2
