

Supplementary Table F: JSSc cardiovascular-specific organ involvement questions

Question	Answer	N (%)
30. For cardiovascular disease, please chose the reasons that you would consider referral for ASCT. The cardiovascular reasons could indicate severe disease, progressive disease, and/or severe quality of life impairment. <i>(Check all that apply) (N=27)</i>	- Pulmonary Hypertension	23 (85%)
	- Cardiac rhythm abnormalities	18 (67%)
	- Myocarditis/myopathy	25 (93%)
	- Cardiac Failure	20 (74%)
	- Other- not listed	1 (4%) (-)
31. For cardiovascular disease, please rank the reasons that you would consider referral for ASCT. The cardiovascular reasons could indicate severe disease, progressive disease, and/or severe quality of life impairment. <i>*only selected answers in Q30 were available for ranking. (N=18)</i>	- Pulmonary Hypertension	5 (28%)
	- Cardiac rhythm abnormalities	0 (0%)
	- Myocarditis/myopathy	6 (33%)
	- Cardiac Failure	7 (39%)
	- Other- not listed	0 (0%)
32. Would you refer to ASCT only because of cardiac disease severity, progressive worsening, or severe impairment of quality of life? <i>(N=27)</i>	- Yes	24 (89%)
	- No – would also need to have other organ system(s) with severe or worsening disease	3 (11%)
These questions were only provided to the 27 respondents who selected cardiac as organ system involvement which would be a consideration for jSSc referral for ASCT (Question 18).
