

Table S1. Laboratory values upon admission

Laboratory values, Mean (SD)	Consecutive administration group n=33	Non-consecutive administration group n=71	<i>p</i> value
Na (mmol/L)	139.4 (2.9) n=33	139.5 (3.4) n=71	0.82
K (mmol/L)	4.1 (0.6) n=33	4.0 (0.4) n=71	0.25
Ca (mg/dL)	8.9 (0.4) n=28	9 (0.4) n=60	0.24
Mg (mg/dL)	2.0 (0.3) n=10	2.0 (0.3) n=16	0.82
CRP (mg/dL)	0.6 (2.0) n=33	1.1 (4.1) n=71	0.49

Comparisons between the consecutive administration group and the non-consecutive administration group were conducted using the unpaired *t*-test.

Table S2. Patients with an increase in the number of positive DST items within 7 Days

	Consecutive administration group	Non-consecutive administration group
Patients with an increase in the number of positive DST items, n	2	15
DST items, n		
Abnormal sense of reality	1	1
Decreased activity	1	3
Excitement	1	6
Mood fluctuations	1	6
Sleep-wake rhythms	1	8
Delusions	0	0
Hallucinations	1	0
