Supplementary figure 5. Extended phenotypes of intra-tumoral and peripheral T-cells following adoptive transfer of FLY-1A TCR T cells. **a)** Flow cytometric analysis of intra-tumoral T-cells at day 8/9 following ACT into tumor-bearing mice (See **Methods** and legend to **Figure 5** for details). Heatmap reflects percentages of CD3⁺ T-cells that show the following phenotypes: pMHC⁺, CD4⁺, CD8⁺, pMHC⁺ CD4⁺, pMHC⁺ CD8⁺, CD137⁺, CD279⁺, CD366⁺ and CD279⁺ CD366⁺. **b)** Flow cytometric analysis of peripheral T-cells at day 8/9 following ACT into tumor-bearing mice. Heatmap reflects percentages of CD3⁺ T-cells that show the same phenotypes as in a.
