

Supplementary Figure 6.

Supplementary figure 6. FLY-1A TCR T-cells recognize patient-derived melanoma cells. a) FLY-1A TCR T-cells recognize SKCM PDX. IFN- γ production by FLY-1A TCR was measured upon co-culture with single cell suspensions derived from a ROPN1⁺ HLA-A2⁺ SKCM PDX sample (n=2 donors). Mock T-cells were used as a negative control. Abbreviations in figure: Sacituz., Sacituzumab govitecan.
