

**Supplementary Figure S2. TUNEL staining in the ovarian cortex after different culture conditions.** Immunofluorescence for PCNA (yellow) and FOXL2 (magenta) together with TUNEL staining (green) in cryo-thawed cOVA, cryo-thawed tOVA, and freshly isolated tOVA after culture. Dashed line highlights secondary follicles. Scale bar is 100 μm. Mc\_D8, culture after [McLaughlin et al. \(2018\)](#) for 8 days; Xu\_W1/W3, culture after [Xu et al. \(2021\)](#) for 1/3 weeks.
