

Description of Additional Supplementary Files

File name: Supplementary Data 1

File description: Differentially expressed proteins for neonates with disseminated disease compared to controls.

File name: Supplementary Data 2

File description: Differentially expressed proteins for neonates with CNS disease compared to controls.

File name: Supplementary Data 3

File description: Differentially expressed proteins for neonates with skin-eye-mouth disease compared to controls.

File name: Supplementary Data 4

File description: Functional annotation of post-hoc significant proteins (<https://david.ncicrf.gov/>).

File name: Supplementary Data 5

File description: Raw protein expression data.

File name: Supplementary Data 6

File description: F-statistics for protein expression comparisons.
