Supplementary Figure 2

- +Anti-IL-6 0 $\mu\text{mol/L}$
- +Anti-IL-6 10 $\mu\text{mol/L}$
- +Anti-IL-6 100 $\mu\text{mol/L}$

Original images of western blots

The grouping of blots were cropped from different parts of the same gel.

These cropped blots are used in the main figure.

Expression levels of SP1, IRF1 and MYD88 were assayed with western blot, respectively.

Tublin was used as loading internal control. All gels are 10%.
