

Localized molecular chaperone synthesis maintains neuronal dendrite proteostasis

Corresponding Author: Dr Maria Vera

This manuscript has been previously reviewed at another journal. This document only contains information relating to versions considered at Nature Communications.

This file contains all reviewer reports in order by version, followed by all author rebuttals in order by version.

Version 0:

Reviewer comments:

Reviewer #2

(Remarks to the Author)

The authors have addressed my concerns.

Two minor points - it is still unclear what the grey vs red text means in figure 1e. I consider this important because others working on these genes may be interested to determine if that transcript acts the same or different from Hspa8.

The first sentence of the discussion - the semi-colon should be a colon.

(Remarks on code availability)

Reviewer #3

(Remarks to the Author)

The authors adequately addressed all the remaining issues.
