

Description of Additional Supplementary Files

Supplementary Data 1: Proteomics data with identified and quantified proteins.

Tab 1: Comparison of whole cell lysate from Col-0 and *tig2* lines grown at 22°C or exposed for 3 weeks at 4°C.

Tab 2: Comparison of proteins that were identified in ribosomal pellets of Col-0 and *tig2* lines after exposure for 3 weeks at 4°C. Ribosomal pellets resulted from ultracentrifugation of cell lysate through a 25% sucrose cushion.

Tab 3: Comparison of proteins that were identified in ribosomal pellets of Col-0 and *tig2*, grown at 22°C. Ribosomal pellets resulted from ultracentrifugation of cell lysate through a 25% sucrose cushion.
