Title: Three-dimensional ultrastructural analyses of human skin with arrector pili muscle interacting with hair follicle epithelium

Authors: Tomonobu Ezure, Kyoichi Matsuzaki, Urakubo Hidetoshi, Nobuhiko Ohno

Supplementary Figure 1.

Unsegmented electron microscopic images and additional 3D reconstruction images of the middle region of the arrector pili muscle shown in Figure 2. (a, b) Electron microscopic images at low (a) and high (b) magnifications without coloring of segmentation shown in Figure 2 (Fig. 2a, b). (c, d) Three-dimensional reconstruction of the arrector pili muscle shown in Figure 2 (Fig. 2c, d), which is viewed from another angle and depicting an APM bundle (blue) and nerve fibers (yellow). Scale bars: 20 μm (a, c), 2 μm (b).
