

Table 1. Tyrosine phosphorylation and GD3 effects on the growth factor/receptors

Growth factor/receptor	Tyrosine phosphorylation	GD3 effect*
FCS	+	+
PDGF/PDGF receptor	-	-
basic FGF/FGF receptor	-	-
EGF/EGF receptor	+	± [†]

PDGF, platelet-derived growth factor.

*Enhanced tyrosine phosphorylation in GD3⁺ cells with individual growth factors as analyzed with PY20.

[†]A 120-kDa unknown band was detected with higher intensity in the GD3⁺ transfectants.
