In the paper by Brown, Feldman and Nevo (Genetics **96**: 589–609) entitled, "Multilocus structure of natural populations of *Hordeum spontaneum*," equation (22) on page 530 should read:

$$\text{var}[s_k^2 \mid H_0 \text{ is true}] = \{\Sigma h_j - 7\Sigma h_j^2 + 12\Sigma h_j^3 - 6\Sigma h_j^4 + 2[\Sigma h_j - \Sigma h_j^2]^2\}/n, \quad (22)$$
