Fig. 1 Changes in gene expression in LPP2 and LPP3 over-expressing cells

Affymetrix array analysis (RNA isolated from HEK 293 cells, n=3 for each cell line) using whole genome chips showing changes in the expression level of certain genes in (a) LPP2 over-expressing HEK 293 cells *versus* vector-transfected HEK 293 cells; (b) LPP3 over-expressing HEK 293 cells *versus* vector-transfected HEK 293 cells.
