Re: Volume 14, Number 1 (July, 1970)

In the article "Factors influencing inhibitory stimulus control: differential reinforcement of other behavior during discrimination training", by R. G. Weisman, Figure 1, page 89, was copied from a previous article. The correct figure is presented here.

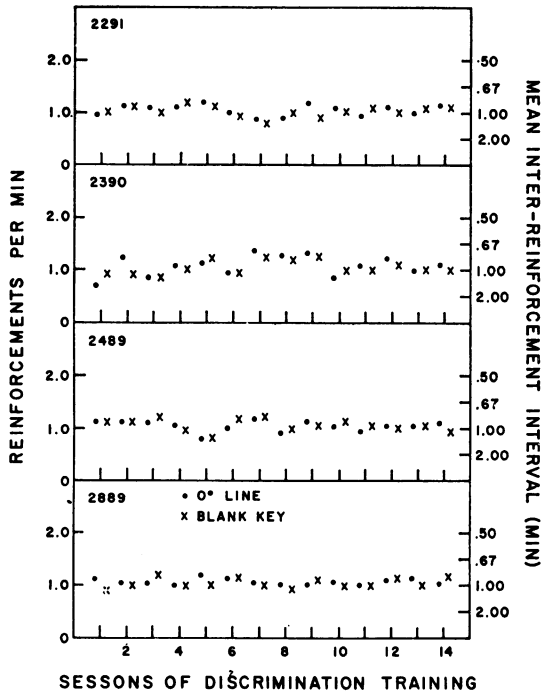

Fig. 1. The rates of reinforcement correlated with the 0° line and blank green key during *mult* VI 1-min DRO. The rates were displaced laterally in plotting to avoid overlap.

Re: Volume 14, Number 1 (July, 1970)

In the article "The response-reinforcement dependency in fixed-interval schedules of reinforcement", by Richard L. Shull, the following reference should have been included on page 60:

Schneider, B. A. A two-state analysis of fixed-interval responding in the pigeon. *Journal of the Experimental Analysis of Behavior,* 1969, **12,** 677-687.
