

SUPPLEMENTARY MATERIAL

Figure S1. Panel A, schematic of luciferase mRNA. Panel B, mRNA sequence of luciferase and target sequence sites of the LNA and LNA-DNA chimera used in these studies.

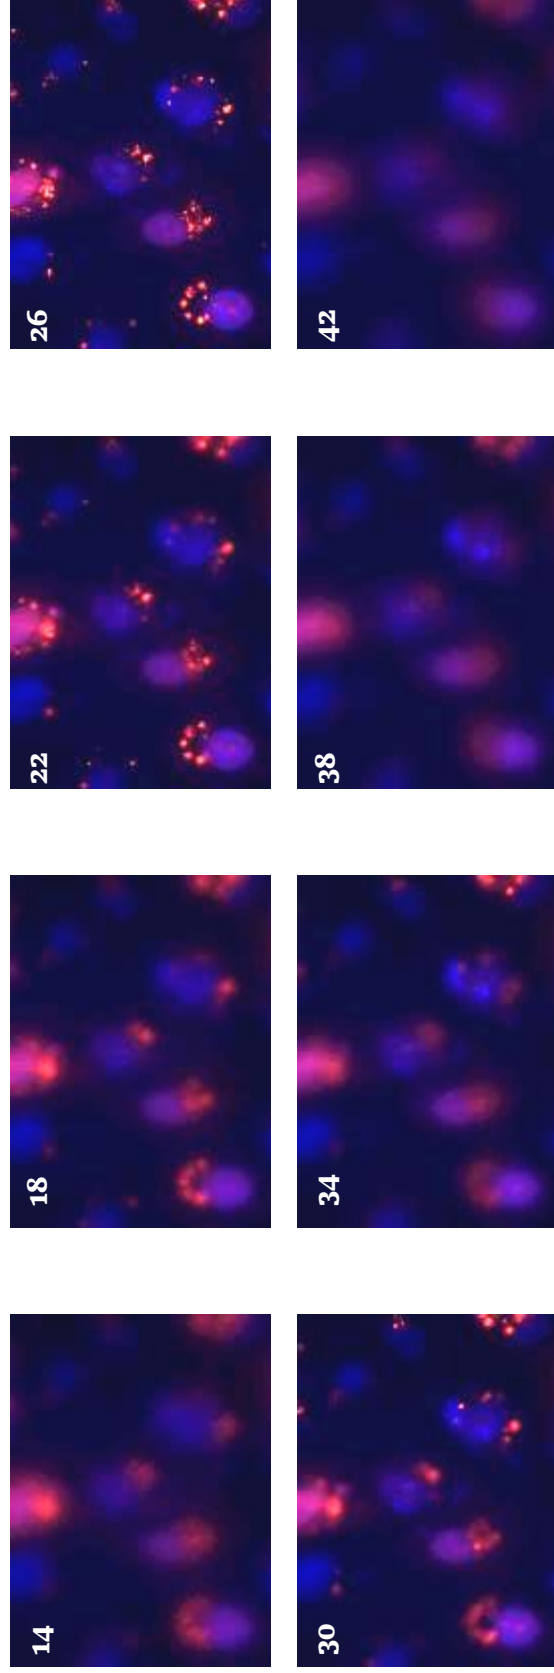

Figure S2. Confocal microscopy images of CV-1 cells treated with Hoechst 33258 and Cy3-LNA-DNA chimera. The optical sections were scanned incrementally (total of 43) along the Z-axis at 0.5 μm . Section numbers corresponding to the Z-axis are given in the upper left of each panel.
