

Table S2 Genes associated with muscle development and contraction are significantly enriched among Myod and Myog targets.

GO Term (biological process)	p-Value	# of target genes annotated to GO term	# of target genes annotated to any GO term	# of genes on array annotated to GO term	total # of genes on array annotated to any GO term
Myod					
muscle development	8.09E-06	13	183	78	7274
muscle contraction	0.003712145	7	183	36	7274
Myog					
muscle development	0.000919443	10	161	78	7274
