

**Additional Figure 3** *TNF/LT* haplotypes in MS patients and controls. (A) *TNF/LT* haplotype frequencies in all MS patients and controls; haplotype designations and entering SNP alleles are shown below. (B) Frequencies of extended haplotypes including *DR15(2)* and different *TNF/LT* haplotypes in all MS patients and controls. Haplotypes are marked in accordance with *DRB1* allele name and *TNF/LT* haplotype designation given in (A). For better visualization, the same axis scales were used.
