

## ELECTRONIC APPENDIX

This is the Electronic Appendix to the article

Biodiversity trends in Europe: development and  
testing of a species trend indicator for evaluating  
progress towards the 2010 target  
by

M. de Heer, V. Kapos and B.J.E. ten Brink

*Phil. Trans. R. Soc. B* (doi:10.1098/rstb.2004.1587)

Electronic appendices are refereed with the text; however, no attempt is made  
to impose a uniform editorial style on the electronic appendices.

## Electronic Appendix A

The distribution of time series data among habitats and countries. The numbers per building block are equal to the number of unique species in a building block. Note that some species have been used in more than one building block and therefore the subtotals do not necessarily equal the number of unique species. The division of the total time series per country among the three major species groups is also shown.
