Electronic appendices are refereed with the text; however, no attempt is made to impose a uniform editorial style on the electronic appendices.

2 Composite tree used in this study to infer relationship between species. For the inter-species relations  
3 we used: (Baker et al. 2003; Baker et al. 2000; Giannini & Simmons 2003; Hooper & Van den Bussche  
4 2003; Jones et al. 2002; Ruedi & Mayer 2001; Teeling et al. 2002; Teeling et al. 2000), for the inter-  
5 familial and lower relationships we used: (Hooper & Van den Bussche 2003; Jones et al. 2002; Teeling  
6 et al. 2002; Teeling et al. 2000) . Where ambiguities were found between references, we gave priority  
7 to the most recent molecular phylogenetic analyses.
