

ELECTRONIC APPENDIX

This is the Electronic Appendix to the article

Parasites in sexual and asexual mollies (*Poecilia*, Poeciliidae, Teleostei): A case for
the Red Queen?

By

Michael Tobler & Ingo Schlupp

Biol. Lett. (doi:10.1098/rsbl.2005.0305)

Electronic appendices are refereed with the text; however, no attempt is made
to impose a uniform editorial style on the electronic appendices.

Table 3: Prevalence and mean intensity with standard deviation of parasites in four populations of molly females of the sexual *P. latipinna* and the asexual *P. formosa* in Central and South Texas (USA). Prevalences were compared using Fisher's Exact Test, mean intensities with Mann-Whitney *U*-Tests.

Population	Parasite	Species	Prevalence	<i>P</i>	Mean intensity	<i>Z, P</i>
County Road 101	<i>Ambiphyra</i> sp.	<i>P. latipinna</i>	0/14	0.126	0	-
		<i>P. formosa</i>	4/20		3.500 ± 1.291	
	<i>Oodinium</i> sp.	<i>P. latipinna</i>	1/14	0.627	1.000	-1.342, 0.180
		<i>P. formosa</i>	3/20		5.000 ± 2.646
