

Supplemental Figure 5: Salinity-induced the expression of GDH in grapevine leaf discs.

(A) *In vitro* aminating GDH specific activity in leaf discs of *Vitis vinifera* L. cv Soutanina.

(B) Immunoreactive GDH protein.

(C) Abundance of *Vv gdh-NAD;A1* transcript encoding for the α -subunit of GDH in leaf discs of *Vitis vinifera* L. cv Soutanina.

Leaf discs were treated with 0, 50, 100 and 200 mM NaCl for 72 h, as described in Materials and Methods. Bars represent \pm SE of three replicates out of two independent experiments.
