

These are electronic appendices to the paper by Morrow & Fricke 2004 Sexual selection and the risk of extinction in mammals. *Proc. R. Soc. Lond. B* **271**, 2395-2401. (doi:10.1098/rspb.2004.2888)

Electronic appendices are refereed with the text. However, no attempt is made to impose a uniform editorial style on the electronic appendices.

Electronic Appendix A

Absolute values for comparative data. Body masses were obtained from Silva & Downing (1995), numbers of species per genus were obtained from Wilson & Reeder (1993), and the number of species threatened was taken from the IUCN Red List of Threatened Species™ (IUCN 2002). See main text for full references.

Electronic Appendix B

Absolute values of male body mass and testes mass together with source references. IUCN categories and population trend data were obtained from the IUCN Red List of Threatened Species™ (IUCN 2002). - = Not threatened; LR = Lower risk; VU = Vulnerable; EN = Endangered; CR = Critically endangered; EX = Extinct; DD = Data deficient (IUCN 1994). Population trend data, where known, was either Down or Stable.

Species	Body mass (g)	Testes mass (mg)	Reference	IUCN category	Population Trend
<i>Acomys cahirinus</i>	27	224	Breed & Taylor 2000	-	
<i>Acrobates pygmaeus</i>	12.3	180	Rose et al 1997	-

Electronic Appendix C

Absolute values for male and female body mass were taken from Silva & Downing (1995). IUCN categories and population trend data were obtained from the IUCN Red List of Threatened Species™ (IUCN 2002). - = Not threatened; LR = Lower risk; VU = Vulnerable; EN = Endangered; CR = Critically endangered; EX = Extinct; DD = Data deficient (IUCN 1994). Population trend data, where known, were either Up, Down or Stable.
