Volume 176, no. 24, p. 7569, Fig. 3: The reported sequence of *regB* of *Rhodobacter capsulatus* is in error. We have recently resequenced *regB* and found three sequencing errors involving a deletion of a G at base pair positions 842, 845, and 859. The sequence in this region thus changes from cggatgcccgcaattgcacgga to cgatcccgcaattgcacga, and the amino acid residues in this region change from GCPNCT to DPELH. None of the conclusions in our study have been affected by these changes. The revised *regB* sequence has been submitted to GenBank and has been assigned accession no. L35179.
