

Supplemental Figure 9. Digital northern analysis of Arabidopsis *THA1* (At1g08630) and *THA2* (At3g04520) Thr aldolase expression. X-axis represents expression levels of the two genes based upon the signal intensities in various organs. Data for the analysis were obtained from the Genevestigator microarray data set (www.genevestigator.ethz.ch; Zimmermann et al., 2004).
