

takes account of the projected expansion of the clinical schools at those universities. The 1200 preclinical places will be distributed among seven medical schools; Charing Cross, St. George's, and five pairs formed from the existing medical schools.

Quality of Nursing

A research project sponsored by the Department of Health and organized by the Royal College of Nursing has been examining methods of measuring and assessing the quality of nursing care. An account of the first two years of the project, *The Proper Study of the Nurse* by Jean K. McFarlane, was published recently by the Royal College of Nursing. The study, which is still under way, has included many of the patients' needs, including emotional, physical, social and therapeutic aspects, and the organizers hope that objective standards of care will be established in these fields.

Dublin Hospital's Bicentenary

The St. Laurence's Hospital (Richmond) will celebrate its 200th year with a programme of scientific and social events, 7-13 May. Former students and others interested may obtain details from the secretary of the hospital, North Brunswick Street, Dublin 7, Eire.

Lieutenant-Colonel J. P. Crowdy, from R.A.M.C., to be Colonel.

ROYAL AIR FORCE

Wing Commander I. M. Ogilvie to be Group Captain.

Corrections

Injuries to the Liver: Analysis of 20 Cases

In the article by Mr. L. H. Blumgart and Dr. T. Vajrabukka (15 January, p. 158) the fifth sentence in the Introduction should have read "The decline in mortality from blunt injury to the liver from 60%⁵ to 30% or less . . ." and not "80%." In Table V the frequency of flail chest should have been "2" and not "5."
