Mechanisms of Action of Aminoglycoside Antibiotics in Eucaryotic Protein Synthesis

DAVID C. EUSTICE AND JAMES M. WILHELM

Department of Microbiology, University of Rochester School of Medicine and Dentistry, Rochester, New York 14642

Volume 26, no. 1, p. 53: The name "gentamicin G418" is given incorrectly in the abstract and line 1 of Materials and Methods. The correct designation of this aminoglycoside is G418; its structure should have been given at its first mention in the abstract and text as: *O*-2-amino-2,7-dideoxy- α -D-glycero-D-gluco-heptopyranosyl-(1 \rightarrow 4)-*O*-[3-deoxy-4-C-methyl-3-methylamino- β -L-arabinopyranosyl-(1 \rightarrow 6)]-2-deoxy-D-streptamine.

MBCs for *Staphylococcus aureus* as Determined by Macrodilution and Microdilution Techniques

CAROL J. SHANHOLTZER, LANCE R. PETERSON, MARY LOU MOHN, JULIA A. MOODY, AND DALE N. GERDING

Laboratory Service, Microbiology Section, and Medical Service, Infectious Disease Section, Veterans Administration Medical Center, Minneapolis, Minnesota 55417

Volume 26, no. 2, p. 217: The second sentence in the legend to Fig. 2 should read "Wells were subcultured immediately after inoculation to show potential inhibition from antibiotic carry-over (A) and after 24 h of incubation in well (B)."
