Current Data Parameters  
nv23p1d

Note: The compound is not completely pure - the rise exp'n centres and for example, in 2/1, immediately below, you can see noise from the impurities! The data is good, however, if you concentrate on the obvious, large, ones.

- H4 → good rise to H2, H3 and OMe12 (key) to C1, C3, C4 relationship
- H2 → good rise to H4, H1, H3, OMe12
- H3 → good rise to Me9, H4, H2
- H1 → good rise to H2, H3, OMe9
- H5 → good rise to Me9, OMe9, H2 (key) to C1, C3, C4 relationship
- OMe9 → good rise to Me9, H2, H1, H5 (key) also, for consistency with the above
