Identification of a T Lineage-Committed

Progenitor in Adult Blood

Andreas Krueger and Harald von Boehmer

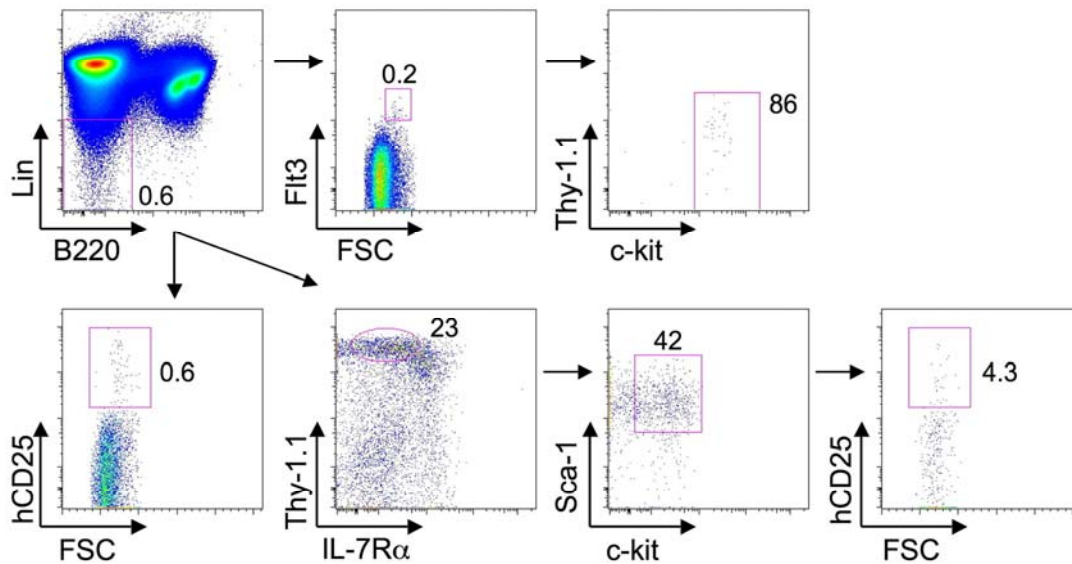

Figure S1. Proportion of hCD25⁺ Cells in the Lin⁻B220⁻Thy-1.1⁺IL-7R α ⁺c-kit^{lo}Sca-1⁺Flt3⁻ Population in Peripheral Blood

Peripheral blood cells were stained with antibodies against lineage markers, B220, Thy-1.1, c-kit, Sca-1, hCD25 and Flt3 (upper panels) or IL-7R α (lower panels). The gating strategy is indicated by arrows. Numbers in plots indicate percentages of cells within gates.
