

Supplemental Figure 1. Capillary electrophoresis traces of HPLC-purified *bvgS* LDR oligonucleotides
HPLC-purified oligonucleotides were assayed for purity by capillary electrophoresis by the manufacturer (IDT). Elution time in minutes is plotted on the X-axis and absorbance units at 254 nm (AU) are plotted on the Y-axis. (A) *bvgS*-common, (B) *bvgS*-LDR-C7, (C) *bvgS*-LDR-C6.
