

A**B**

Supplemental Figure 3. Number of *TMM*-expressing cells visible on one surface of the entire hypocotyl. (A) The *TMM*-expressing cells in the wild-type and *CYCD4*-OE seedlings at 11 days after germination were counted by GUS staining. Data are presented as mean \pm SE for 10 samples. (B) The *TMM*-expressing cells in the wild-type and *cycd4* mutant seedlings at 4 days after germination were counted. Data are presented as mean \pm SE for 8 samples.
