Appendix: Means and standard errors of independent variables used in logistic and multinomial regression analysis.

	Uninsured with a regular source of care		Uninsured with no regular source of care	
	Mean	S.E.	Mean	S.E.
Sample (n)	3,047		1,665	
Weighted population (in thousands)	23,050		13,517	
CHC grant revenue per poor person within 5 miles	3.90	0.4	3.26	0.4
County is CAP grant recipient (%)	27.1	5.9	33.3	9.4
Physician charity care hours per uninsured in site	6.59	0.4	6.54	0.5
Number of safety net hospitals within 10 miles	1.65	0.2	1.83	0.2
Age 0-17 (%)	17.3	1.2	10.8	1.6
Age 18-34 (%)	38.9	1.8	48.6	2.0
Age 45-64 (%)	23.3	1.5	20.4	1.5
Male (%)	49.7	1.1	60.9	2.4
Black (%)	15.9	2.1	11.0	2.4
Hispanic citizen (%)	10.7	1.7	12.5	1.6
Hispanic non-citizen (%)	14.7	1.9	30.7	5.2
Other race/ethnicity (%)	5.2	0.8	6.7	1.3
Family income 100-199% FPL (%)	32.6	1.9	34.7	2.9
Family income 200-299% FPL (%)	18.4	1.4	13.4	1.6
Family income 300-399% FPL (%)	8.8	1.0	8.9	1.4
Family income 400% FPL or greater (%)	13.6	1.4	15.1	1.6
Single person family (%)	30.1	1.4	40.7	2.2
Married couple, no children (%)	14.5	1.4	14.5	1.9
Single-parent family (%)	16.3	1.4	12.2	2.1
Person in poor health (%)	19.3	1.2	21.7	1.7
Other person in family in poor health (%)	26.7	2.3	27.8	3.4
Person has 1 chronic condition (%)	16.7	1.0	13.3	1.4
Person has 2+ chronic conditions (%)	10.8	0.7	4.2	0.6
Other person in family with 1 chronic condition (%)	19.9	2.2	14.4	1.9
Other person in family with 2+ chronic conditions (%)	16.0	1.7	10.1	1.5
Education (in years)	12.0	0.1	11.5	0.1
Number of persons in family	2.76	0.1	2.36	0.1
Likely to see doctor (%)	33.1	1.6	30.6	1.6
% of persons in zip code below poverty	14.3	0.7	14.9	0.9
