

| | Baldspot | FKBP39 | dIPK | cathD | Atg8a |
|----------------|---|---|---|--------------|--------------|
| eyGal4 | no phenotype | small eye, patterning defects | L2 lethal | no phenotype | no phenotype |
| GMRGal4 | no phenotype | rough eye | slight pigmentation defects in 20% of animals | not done | not done |
| cgGal4 | no phenotype | pupal lethal, autophagy inhibited, delayed development | no phenotype | no phenotype | no phenotype |
| actGal4 | no phenotype | L3 lethal, small larvae, delayed development | E/L1 lethal | not done | not done |
| tubGal4 | no phenotype | not done | E/L1 lethal | not done | not done |
| hsGal4 | pupariation defects, melanotic tumors in 10% of animals | greatly enlarged nucleolus in fat body cells 8 hours after heat shock | no phenotype | no phenotype | no phenotype |
