

## AUTHOR'S CORRECTION

### Sym Plasmid Genes of *Rhizobium trifolii* Expressed in *Lignobacter* and *Pseudomonas* Strains

JACEK PLAZINSKI AND BARRY G. ROLFÉ

*Department of Genetics, Research School of Biological Sciences, Australian National University, Canberra City ACT 2601, Australia*

Volume 162, no. 3, p. 1261–1269: It should be noted that Ronson and Scott (C. W. Ronson and D. W. Scott, p. 177–187, in A. Pühlér, ed., *Molecular Genetics of the Bacterial-Plant Interaction*, 1983) found that *Pseudomonas aeruginosa* PAO2003 and PAO2003(pPN1) caused root hair distortions on white clover but that no specific effect of plasmid pPN1 was observed. These results are in contrast to ours; however, different *Pseudomonas* strains and plant assay conditions were used.

p. 1264, column 1, line 28 of the text: “*EcoRI*” should read “*HindIII*.”

p. 1266, column 2, Fig. 5 legend, line 1: “*EcoRI*-cleaved” should read “*HindIII*-cleaved.”
