

Supplementary material

$$H' = \sum_{i=1}^n p_i \log_2 P_i \rightarrow (1)$$

Where n is the total number of SNP/indel states (10) pi= proportion of ESTs in the ith type of SNP/indel state. The calculated value is divided by the log₂10 to get uniformity.

Result	Abnormal apex	Normal apex	Female inflorescence	Male inflorescence	Immature zygotic embryo	Mesocarp Tissue	Total
Total No of ESTs	998	313	349	625	126	3039	5452
