

Supplemental figure 2. Cyclin T1 and cyclin T2 participation in adipose tissue biology
(A-B) Expression of cyclin T1 (A) and cyclin T2 (B) mRNA measured by real-time PCR in the adipose tissue of mice fed a chow diet (C57BI/6), a high fat diet (HFD), or in the adipose tissue of obese db/db mice. Results are normalized for the expression of β -actin mRNA.

A**CycT1****B****CycT2**
