

Selected List of Books and Journals for a Small Dental Library

BY ROBERT B. RASKIN, D.M.D., *Director*

*Division of General Dentistry, Department of Dentistry
Nassau County Medical Center
East Meadow, New York*

ISABEL V. HATHORN, *Librarian*

*Suffolk Academy of Medicine
Hauppauge, New York*

ABSTRACT

This subject list of 116 dental books and 20 dental journals is intended to help the dental book committee and the librarian of a small health sciences library achieve a balanced collection of dental books and journals. Cost of books totals \$2,619.38, that of journals is \$531.50, making a total of \$3,150.88. Cost of starred books totals \$1,083.75, that of starred journals is \$134.00, making a total of \$1,217.75.

THIS IS the first revision of the "Selected List of Books and Journals for a Small Dental Library" [1]. As the original article stated, this list should serve primarily as a guide; the local needs of small dental libraries will determine selection of both texts and journals. With the probable advent of mandatory continuing educational requirements, the need for such libraries will become ever more apparent.

It is impossible to include every relevant text and journal. However, with care and constant review, a small dental library that will serve the many needs of the local professional community can be developed and maintained. Budget limitations and user needs will be the determining factors of the degree of sophistication of such libraries. The authors believe that dental societies and hospitals with functioning dental staffs will have an ever-increasing obligation to provide library resources to their memberships. Small dental libraries are not designed to replace those of major universities or libraries; through interlibrary loan networks, the resources of these larger libraries are necessary supplements to any smaller collection.

Texts can be ordered directly from publishers, but it is better to use reliable book dealers, as they give discounts and often pay postage as well. Journals can also be ordered through jobbers; a fee is charged for this service. Depending on the size of

the small dental library and the work load of the librarian, it may be more economical to order journals directly.

The cost of the texts in this list is approximately \$2619.38; that of journal subscriptions is \$531.50, making a total of \$3,150.88. The cost of starred items comes to \$1,083.75 for books and \$134.00 for journals, making a total of \$1,217.75.

Some texts noted on the first list have since gone out of print; others have appeared in new editions. Unless a library has a large budget, updating must be done selectively. A constant review of published texts and an evaluation of those in the library collection must be an ongoing process. It is hoped that this list will help librarians of small dental libraries with this task.

ACKNOWLEDGMENTS

We would like to acknowledge our debt to Alfred N. Brandon and Dorothy R. Hill [2], compilers of the "Selected list of books and journals for the small medical library," for the format of this bibliography.
