

Amino acid sequence numbering
and location of key sequences

		Polypeptide chain designation			Sequence number
		A	B	C	
	N-telopeptide region	1 – 16	1 – 8	1 – 14	
	Collagenase binding region	782 – 809	774 – 801	780 – 807	
	Collagenase cleavage site	791 – 792	784 – 785	789 – 790	
	C-telopeptide region	1028 – 1054	1022-1026	1026 – 1054	

Chain designation polypeptide type

A	α 1
B	α 2
C	α 1

Chains A and C are identical but are staggered by the equivalent of 2 amino acid positions in relation to one another
