

NOTICE OF DUPLICATE PUBLICATION

Molecular Genetic Analyses of a 376-Kilodalton Golgi Complex Membrane Protein (Giantin)

HANS PETER SEELIG, PETER SCHRANZ, HENNRİK SCHRÖTER, CLAUDIA WIEMANN,
GARETH GRIFFITHS, AND MANFRED RENZ

*Institute of Immunology and Molecular Genetics, Karlsruhe, and European Molecular
Biology Laboratory, Heidelberg, Germany*

The publisher hereby withdraws the above-entitled article (*Mol. Cell. Biol.* **14**:2564–2576, 1994). This paper substantially duplicated a previous publication (“Macrogolgin—A New 376 kD Golgi Complex Outer Membrane Protein as Target of Antibodies in Patients with Rheumatic Diseases and HIV Infections,” by Hans P. Seelig, Peter Schranz, Hennrik Schröter, Claudia Wiemann, and Manfred Renz, *J. Autoimmun.* **7**:67–91, 1994). In particular, Fig. 1, 2, 3, and 5 and part of Fig. 6 in the *Molecular and Cellular Biology* article duplicate Fig. 1, 2, 3, 4, and 5 of the *Journal of Autoimmunity* article.

Duplicate publication violates the editorial policy of the American Society for Microbiology as set forth in the Instructions to Authors for all ASM journals.
