Supplemental Figure 3. Alignment of SNRK2 protein family in *Chlamydomonas*. The predicted SNRK2 proteins were aligned with BioEdit 7.0.5.3 software. The black and grey boxes indicate identical and similar amino acids, respectively. The extra loop segment present in SNRK2.1, SNRK2.3 and SNRK2.4 (dotted line), the conserved NLH motif (***) , the putative phosphorylation sites present in this extra segment (red letters) and the conserved phosphorylated Ser (#) are noted. The sequences of SNRK2.4, 5, 6 and 8 may be incomplete or partially incorrect since the transcript sequences have not been confirmed and the genomic sequence information is not complete.
