

Table S1. Mutation frequency at the endogenous V4-39 locus of BL2 clones transfected with WT-AID-EGFP- or mutNES-AID-EGFP-inducible expression vectors^a

Clone name	Number of mutations/	
	number of sequences	Mutation frequency
WT-6	15/53	0.73×10^{-3}
WT-14	16/54	0.76×10^{-3}
WT-24	13/65	0.51×10^{-3}
Mean of WT clones		0.67×10^{-3}
mutNES-5	30/72	1.07×10^{-3}
mutNES-16	69/72	2.39×10^{-3}
mutNES-42	19/45	1.08×10^{-3}
Mean of mutNES clones		1.51×10^{-3}

^a390 bp of the rearranged V4-39-J_H4 sequence were determined.
