

Supplementary Figure Legends

SUPPLEMENTARY FIGURE 1. Color images from Fig. 1B and an overlay are shown.

Bar = 2 μm . High magnification images show that GFP-N-WASP puncta are in close apposition to SV2 and completely merged with PSD-95 clusters (right panels). Bar = 0.4 μm .

SUPPLEMENTARY FIGURE 2. Color images from Fig. 3B and overlays are shown.

Bar = 2 μm .

SUPPLEMENTARY FIGURE 3. Color images from Fig. 4B and overlays are shown.

Bar = 2 μm .

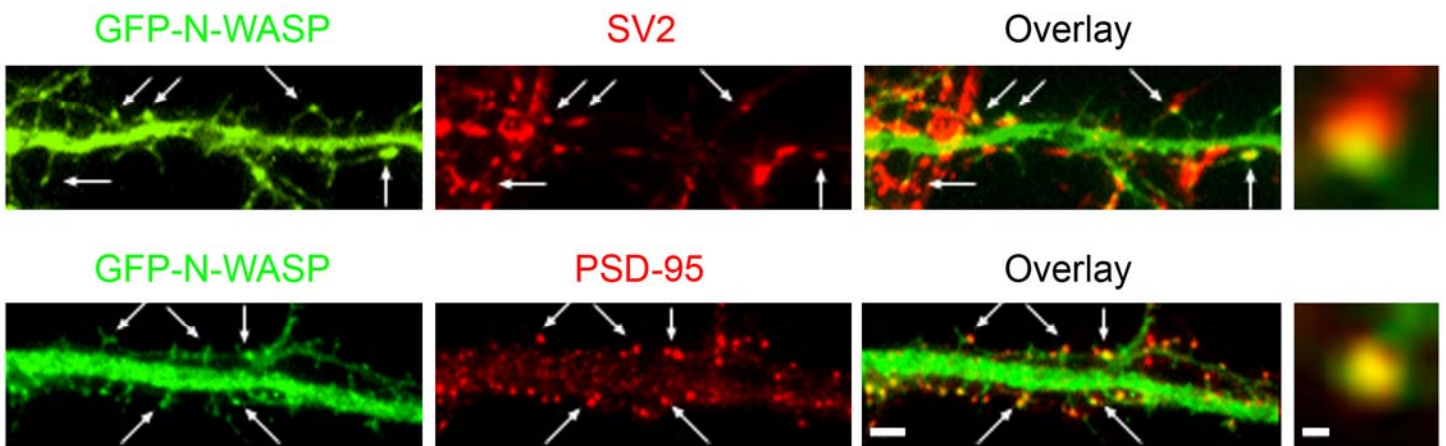

SUPPLEMENTARY FIGURE 4. Color images from Fig. 5B and overlays are shown.

Bar = 2 μm .

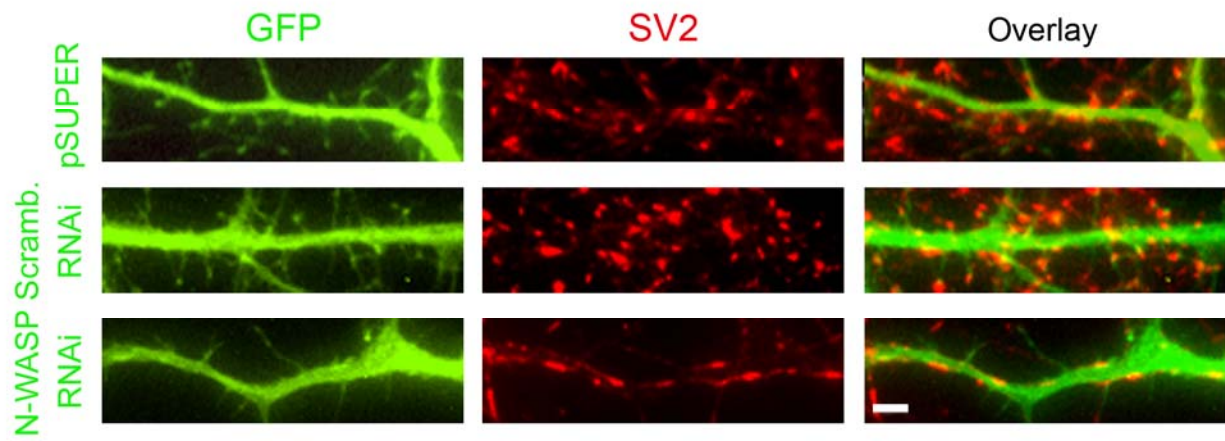

SUPPLEMENTARY FIGURE 5. Color images from Fig. 6C and overlays are shown.

Bar = 2 μm .
