Supplementary Figure 1

(a) Ring-Ring Angles

(b) Ring-Ring Distances

Figure S1: Distribution of ring-ring angles and distances. **(a)** A histogram of angles between the ring planes of consecutive protein interacting nucleotides. The X-axis is the cosine of the angle. The Y-axis is the frequency of occurrence in the AND-set and OR-set datasets of protein-RNA complexes. **(b)** An histogram of distances between the ring planes of consecutive protein interacting nucleotides. The X-axis is the distance (in Å). The Y-axis is the frequency of occurrence in the two datasets.
