

SUPPLEMENTARY DATA

Fig. 1: **Inhibition of IKK does not effect TB2-T1 cell proliferation.** TB2-T1 cells were seeded in a 6-well plate (250,000 cells/well). The following day cells were rinsed twice with PBS and serum-starved overnight in DMEM. Serum-starved cells were treated with 50 ng/ml of SDF-1 α and 1 μ M of IKK β VI inhibitor. The following day cells were counted (24 hr).
