Supplemental Table 1: Accuracy and Reaction Time Across Experimental Rounds

	Accuracy (Mean ± SD)	t-value (compared to chance performance, *indicates p< 0.05, two-tailed)	Reaction time (ms; Mean ± SD)
Round 1	50% ± 0	N/A	2012 ± 330
Round 2	61.97% ± 7.74	t(10) = 5.13*	2133 ± 220
Round 3	75.15% ± 7.13	t(10) = 11.70*	2039 ± 214
immediate post-test	83.03% ± 8.06	t(10) = 13.60*	2854 ± 595
1 week post-test	71.67% ± 11.60	t(9) = 5.91*	3639 ± 752

Note: The 1 week post-test results do not include data from one participant, who failed to return for the post-test.
