

Figure S2. Real-time RT-PCR analysis of *OSHB* genes in various tissues. Expression level was normalized to that of *eEF-1 α* . Bars indicate standard deviation. SA, shoot apex including young leaf primordia; IL, immature leaf; IA, 5-mm-long inflorescence apex; IP, 5-cm-long immature panicle; FL, immature flower; EM, embryos at 5 days after pollination; RT, root.
