Site positions, based on aligned sequences, counted from the nucleotide next to the 3' end of the forward primer are in parentheses.

The WCt17 locus was amplified using WCt17 forward and WCt18 reverse primers [14].

WCt24h has one or two repeats of the unit minisatellite CTTCGTTACCTAGTTATTAA.

trnLFb is in the intergenic spacer region between the *trnL* (UAA) and *trnF* (GAA) genes [16].

trnTLa and *trnTLb* are in the intergenic spacer region between the *trnT* (UGU) and *trnL* (UAA) genes [16].

trnTLa has one or two repeats of the unit sequence ATTTTT.
