

Supplemental Figure S4. GC-MS total ion chromatograms (TICs) of extracts from pepper leaves infected with virulent (D_{s1}) or avirulent (Bv5-4a) *Xanthomonas campestris* pv. *vesicatoria* (Xcv). A, GC-MS TICs of standard mixtures. a: (-)-menthone, b: camphor (internal standard), c: (+)-(3S)-neomenthol, and d: (-)-(3R)-menthol. B, GC-MS TICs of extracts from uninoculated healthy pepper leaves. C, GC-MS TICs of extracts from pepper leaves infected with virulent strain D_{s1} of Xcv. D, GC-MS TICs of extracts from pepper leaves infected with avirulent strain Bv5-4a of Xcv.
