Meta-analysis of depression and substance use and impairment among cocaine users

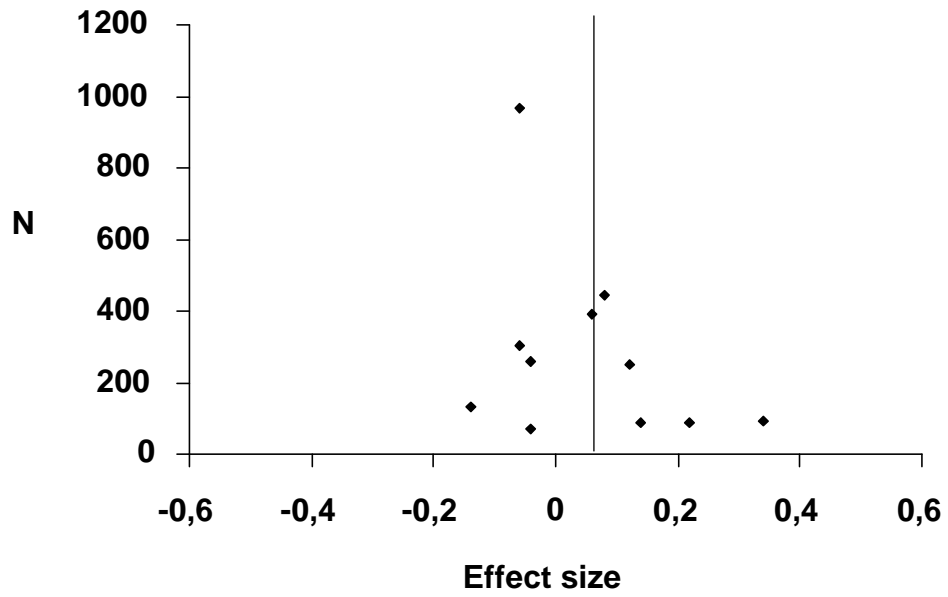

Kenneth R. Conner, Martin Piquart, Amanda P. Holbrook.

This material supplements but does not replace the content of the peer-reviewed paper published in *Drug and Alcohol Dependence*. There are five funnel plots displayed here. Interpretations of the plots are provided in the text in section 3.4.

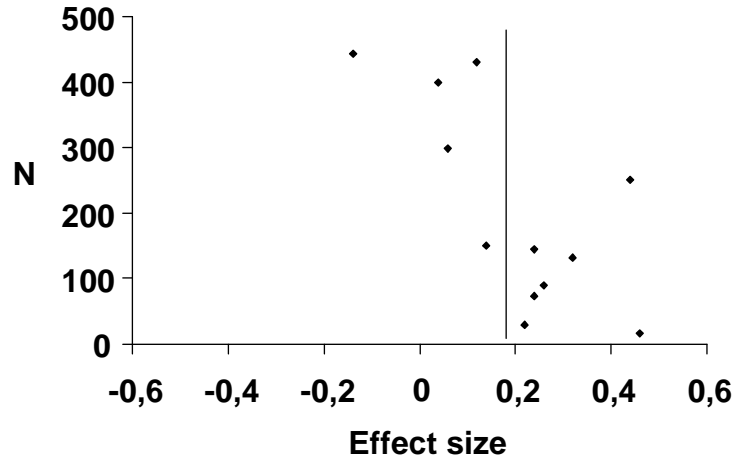

Supplemental Figure A. Funnel plot showing association of depression with concurrent cocaine use and impairment

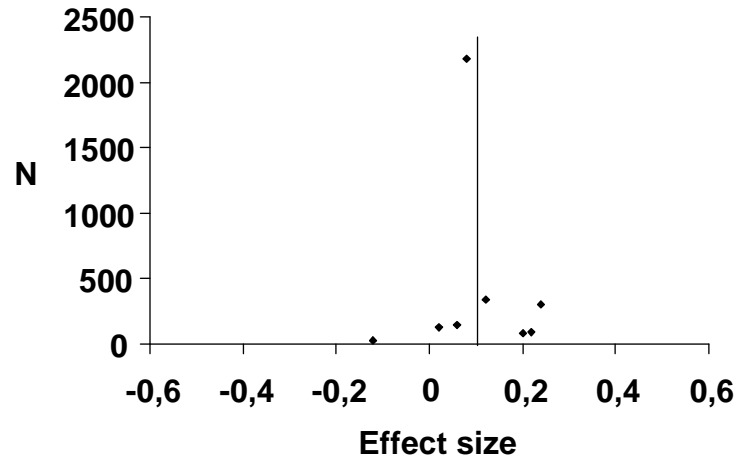

Supplemental Figure B. Funnel plot showing association of depression with prospective cocaine use and impairment

Supplemental Figure C. Funnel plot showing concurrent association of depression with alcohol use and impairment

Supplemental Figure D. Funnel plot showing association of depression with general drug use and impairment

Supplemental Figure E. Funnel plot showing change in depressive symptoms
